## **FY2014 vs. FY2013**

### **Revenue**

The Group's revenue increased by RMB 31.9 million (or 5%) to RMB 649.1 million. This was mainly due to the increase in the sales of the Zipper Slider segment (RMB 7.1 million), the Trading segment (RMB 53.9 million) and the Processing segment (RMB 0.7 million). The increase was partially offset by the decrease in revenue contributions from the Zipper Chain segment (RMB 25.1 million).

The inter-segment sales elimination represented the dyeing and electroplating services provided by the Processing segment to the Zippers segment.

The increase in revenue from the Zipper slider segment and the Processing segment in FY2014 was attributable to an increase in sales orders from new customers arising from the efforts of the Group's sales department focusing on developing new customers' channels.

The decrease in revenue from the Zipper Chain segment was attributable to a deteriorating market for the zipper industry in the PRC which was adversely affected by the general slowdown in the global economy. This had resulted in the Group reducing its selling prices to retain customers' orders. The average selling prices in the Zipper Chain segment had decreased by 11% per kg while the sales volume had increased by 4%.

The Group's Trading segment relates to the sourcing and buying of certain raw materials in accordance to customers' requirements. The profit margin and all purchases were based on confirmed sales. As such, the volume of trading depends on the opportunities available so as the profitability and price movements which are dependent on customers' demand for raw materials. The increase in revenue from the Trading segment was due to an increase in sales orders from customers during FY2014.

### **Gross Profit and Gross Profit Margin**

The Group's gross profit increased by RMB 0.6 million (or 1%) to RMB 50.7 million. The increase was due mainly to the increases in profit margin from the Processing segment and also increase in sales from the Trading segment.

Average gross profit margin decreased by 0.3 percentage points to 7.8% due to the decrease in gross profit margin from the Zipper Slider segment in FY2014. This was attributable to the increase in cost of raw materials in the Zipper Slider segment.

### **Other income and other expenses**

Other income mainly comprises gain on fair valuation from investment properties, government subsidies, write-back of specific provision for bad debts in FY2013 as a result of successful collections from customers and foreign exchange gains. The net income represented the increase in gain on fair valuation from investment properties (RMB15.8 million), the increase in foreign exchange gain as a result of the depreciation of RMB against USD and SGD arising from the balances in the Company's bank account.

### **Selling and distribution expenses**

Selling and distribution expenses decreased by RMB 1.2 million (or 15%) to RMB 6.9 million. The decrease was due mainly to a reduction in headcount following the re-organisation of the Group's sales department

## General and administrative expenses

General and administrative expenses decreased by RMB 201.4 million (or 81%) to RMB 46.5 million. This was mainly due to the RMB18.1 million decrease in amortization of intangible assets expense on lower intangible assets in FY2014 and the RMB6.8 million decrease in allowance for doubtful trade receivables. There was also an absence of impairment of intangible assets of RMB175.0 million and inventory written down expenses of RMB3.0 million in FY2014.

The decrease in allowance for doubtful debts of RMB 6.8 million was as a result of strengthening the control of customers' credit period and limit.

Provision for social security contribution represented the under-provision of social security contribution in FY2014 and FY2013. The Group had made a more detailed computation of the provision required for social security contribution for FY2014 and FY2013 to ensure full compliance with the prevailing PRC rules and regulations.

## Finance income and expenses

Finance expenses increased by RMB 4.0 million (or 51%) to RMB 11.9 million. This was attributable to the increase in short-term loans and bills transactions with banks. Finance income increased by RMB 0.1 million (or 2%) to RMB 2.1 million due mainly to the increase in cash and bank balance.

NM: Not Meaningful

## Notes:

<sup>1</sup> Current tax decreased by RMB 0.8 million or 18% due to a decrease in taxable profit before taxation in FY2014.

<sup>2</sup> On 22 February 2008, the State Administration of Taxation of China issued a circular Caishui 2008 No.001, which states that distribution of dividends from profits accumulated from 1 January 2008, shall be subject to withholding tax on distribution to foreign investors. Accordingly, the Group has provided for deferred tax liabilities on the Group's profit-making PRC subsidiaries' net profit attained from 1 January 2008 onwards. As Jade Star (the PRC's subsidiaries' immediate holding Company) is incorporated in the British Virgin Islands, the applicable withholding tax rate is 10%.

<sup>3</sup> Deferred tax arising from temporary differences in fair value of investment property and depreciation of property, plant and equipment.

## 4Q2014 vs. 4Q2013 (3 months)

### Revenue

The Group's revenue increased by RMB 53.5 million (or 33%) to RMB 216.8 million. The increase was due mainly to the increase in sales of the Trading segment (RMB 60.1 million), and the Processing segment (RMB 0.8 million). This was partially offset by the decrease in revenue

contributions from Zipper Slider segment (RMB 1.5 million), and the Zipper Chain segment (RMB 1.5 million) (collectively referred as the “Zippers segment”).

The inter-segment sales elimination represented the dyeing and electroplating services provided by the Processing segment to the Zippers segment.

The decrease in revenue from the Zippers segment was attributable to a deteriorating market for the zipper industry in the PRC which was adversely affected by the general slowdown in the global economy. This had resulted in the Group reducing its selling prices to retain customers’ orders.

The increase in revenue from the Trading segment was due to the increase in sales orders during 4Q2014, as a result of lower selling prices.

### **Gross Profit and Gross Profit Margin**

The Group’s gross profit decreased by RMB 3.4 million (or 24%) to RMB 10.8 million. The decrease in gross profit was due mainly to the decrease revenue and slight increase in overheads.

Average gross profit margin decreased by 3.7 percentage points to 5.0% due to the decrease in gross profit margin from the Zippers segment in 4Q2014 arising from the higher production costs as a result of increase in staff wages.

### **Other income and other expenses**

Other income comprises mainly gain on fair valuation from investment properties, government subsidies, write-back of specific provision for bad debts (provided in 4Q2013) as a result of successful collections from customers and foreign exchange gains. The net income represented the increase in gain on fair valuation from investment properties (RMB15.8 million), the increase in foreign exchange gain as a result of the depreciation of RMB against USD and SGD arising from the balance in the Company’s bank account.

### **Selling and distribution expenses**

Selling and distribution expenses decreased by RMB 0.5 million (or 21%) to RMB 1.8 million. The decrease was due mainly to a reduction in headcount following the re-organisation of the Group’s sales department

### **General and administrative expenses**

General and administrative expenses decreased by RMB 162.5 million (or 95%) to RMB 7.7 million. This was mainly due to the absence of impairment of intangible assets RMB155.6 million.

The write back on allowance for doubtful debts of RMB 4.9 million was the result of strengthening the control of customers’ credit period and limit.

Provision for social security contribution represented the under-provision of social security contribution in FY2014 and FY2013. The Group had made a more detailed computation of the provision required for social security contribution for FY2014 and FY2013 to ensure full compliance with the prevailing PRC rules and regulations.

### **Finance income and expenses**

Finance expenses increased by RMB 3.9 million (or 160%) to RMB 6.4 million. This was attributable to the increase in bills payable and short-term loans compared to the previous corresponding period. Finance income decreased slightly by RMB 0.1 million to RMB 0.5 million as the cash and bank balance had remained about the same level in 4Q2014.

### Notes:

<sup>1</sup> Current tax decreased by RMB 1.0 million or 46% due to a decrease in taxable profit before taxation in 4Q2014.

<sup>2</sup> On 22 February 2008, the State Administration of Taxation of China issued a circular Caishui 2008 No.001, which states that distribution of dividends from profits accumulated from 1 January 2008, shall be subject to withholding tax on distribution to foreign investors. ## FINANCIAL POSITION

### Non-current assets

As at 31 December 2014, non-current assets amounted to RMB 655.8 million comprising property, plant and equipment, investment property, land use rights, prepayment and intangible assets.

The Group's property, plant and equipment amounted to RMB 323.9 million, a decrease of RMB 0.9 million compared to RMB 324.9 million as at 31 December 2013. The decrease was due mainly to depreciation expenses but partially off set by purchase of new properties, plant and equipment during the year for automation of its production process.

As at 31 December 2014, the investment properties represented the recognition of the construction cost of the Group's Xiamen Headquarters project ("HQ Project") under FRS40 - "Investment property is property held to earn rentals or for capital appreciation or both." According to the Group's construction plan, the HQ Project will have 25 floors, and most of the office units will be leased out to earn rental income. Therefore, this property including the land use right was classified as investment properties under FRS40.

The decrease in land use rights and intangible assets was due mainly to the amortization expenses.

The prepayment balance in FY2014 represented the deposits paid for purchases of machinery.

### Current assets

As at 31 December 2014, current assets amounted to RMB 772.4 million, an increase of 14% (RMB 94.7 million) compared to RMB 677.7 million as at 31 December 2013. This was due largely to the increase in inventories, trade and other receivables, prepayments, cash and bank balances.

Inventories increased by RMB 2.9 million due to a build-up of inventory to meet the minimum production requirement in the 1Q2015 for economies of scale purpose.

Trade and other receivables increased by RMB 54.1 million from RMB 215.5 million to RMB 269.6 million due to an extension of credit period granted to some long time customers so as to retain their orders.

The increase in prepayments to suppliers was due mainly to the increase in advances made to certain suppliers. The Group made advance payments to these suppliers to secure ready supply of raw materials at competitive prices. It is a usual practice of the Group to make advance payments to suppliers to enable the Group to secure the price and supply of raw materials for the whole year. This would enable the Group to enjoy cost savings in the event of raw material price fluctuations.

Cash and bank balances increased from RMB 253.0 million to RMB 285.7 million due mainly to the increase in short-term bank loans.

### **Current liabilities**

As at 31 December 2014, total current liabilities were RMB 629.3 million, an increase of 28% (or RMB 137.0 million) compared to RMB 492.3 million as at 31 December 2013. This was mainly attributable to the increase in other payables and accruals, short-term bank loans, amounts due to a Director, and bank overdrafts, which was offset by the decrease in trade payables, and bills payable to banks.

Trade payables decreased by RMB 2.8 million due mainly to the increase in usage of bills payable during FY2014.

Bills payable to banks decreased by RMB 15.9 million due mainly to the settlement of some bills payables during FY2014.

The other payables and accruals increased by RMB 24.4 million to RMB 204.1 million was due mainly to the accrual of the construction costs for the building of the Group's Xiamen Headquarters.

Short-term bank loans increased by RMB 94.5 million (or 66%) to RMB237.2 million due to proceeds from new banking facilities in order to maintain a better financial position, please refer to page 4 for further information.

Bank overdrafts represented the drawdown of the banking facilities from Hang Seng Bank.

The amount due to a Director was due to funds contributed by Mr Hong Qing Liang for the Group's Xiamen Headquarters construction project. The construction costs were paid by Mr Hong from his personal bank account in Hong Kong first and reimbursed by the Company. This arrangement was undertaken as the local government of Xiamen Island will impose an interest tax on all monies transferred from other locations within the PRC. Remittances from Hong Kong and foreign countries are exempted from such tax.

### **Non-current liabilities**

Non-current liabilities comprise deferred tax liabilities. The increase in deferred tax liabilities was due mainly to the increase in withholding tax as explained above under the note for tax expense.

## **CASH FLOW**

### **Operating activities**

Net cash flows used in operating activities in FY2014 amounted to RMB 5.3 million while net cash flows generated from operating activities in FY2013 amounted to RMB 2.3 million. This was due mainly to the increase in bills receivables, the decrease in trade and bills payables.

Net cash flows generated from operating activities in 4Q2014 amounted to RMB 44.5 million while net cash flows used in operating activities in 4Q2013 amounted to RMB 8.2 million. This was due mainly to the increase in amount due to a director, bills payables, other payables and accruals.

#### **Investing activities**

Net cash flows used in investing activities in FY2014 amounted to RMB 81.7 million while net cash flows generated from investing activities in FY2013 amounted to RMB 26.6 million; and net cash flows used in investing activities in 4Q2014 amounted to RMB 53.9 million while net cash flows generated from investing activities in 4Q2013 amounted to RMB 68.7 million. This was due mainly to proceeds from disposal of investment properties in 4Q2013.

#### **Financing activities**

Net cash flows generated from financing activities in FY2014 amounted to RMB 102.6 million compared to RMB 45.7 million in FY2013. This was due mainly to new short-term bank loans and banking facilities obtained, please refer to page 3 for further information.

Net cash flows generated from financing activities in 4Q2014 amounted to RMB 8.3 million while net cash flows used in financing activities in 4Q2013 amounted to RMB 22.8 million. This was due mainly to the repayment of short-term bank loans after proceeds received from disposal of investment properties in Hong Kong in 4Q2013.

**9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results.**

The performance for 4Q2014 and FY2014 is line with the commentary made in item 10 of the Company's results announcement dated 10 November 2014.

**10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.**

For the year ended 31 December 2014 ("FY2014"), the Group continued to operate under a highly competitive and challenging environment as the zipper industry in the PRC faces intense competition with thin profit margins. Apart from the challenging and competitive business environment, the Group also faces weak demand for zippers as most of its customers still hold a high level of inventories in their warehouses. As such, the Group had to lower its selling prices to retain customers and attempt to increase sales orders.

The average utilization rates of the Group's production facilities in FY2014 for zipper chains and zipper sliders were approximately 81% and 62% respectively.

For the three months ended 31 December 2014 and FY2014, the Group managed to record a profit before tax despite the challenging market conditions. This was as a result of the partial automation of the Group's production processes which has been cost effective and resulted in more stringent control of production overheads.

Notwithstanding the above, the Group expects the zipper industry to remain highly challenging and competitive. The Group expects the continuation of the slowing economic growth in the PRC, uncertainties for export sales, as well as cost pressures arising from rising production and labour costs. These factors will affect the Group's operating outlook for the next twelve months.

The Group will continue to strive to enhance its operational efficiency of its plants through automation of its production processes, so as to mitigate the impact of weak demand to the Group's gross profit margins. The Group will also continue to exercise tight control on the administrative expenses and strive to lower its production unit cost.

Update on construction progress of the Company's Xiamen Headquarters

The construction work for the Company's Xiamen Headquarters basement (comprising 4 levels) had commenced in 1Q2014 and as of to-date, the Group's Xiamen Headquarters is approximately 60% completed.
